DETAILED ACTION

Allowable Subject Matter

1. Claims 1-14 are allowed.

The following is an examiner's statement of reasons for allowance: After reviewing the remarks made by the Applicant in response to the non-final office action the Examiner finds the remarks to be persuasive. The most pertinent prior art is Kondo et al (US 2002/0111939) and Koshimizu et al (Keyword and Face image retrieval based on latent semantic indexing, IEEE 2004). Kondo discloses an image retrieving device (image data retrieval apparatus, 100,200, figure 1) for classifying and retrieving an image by detecting an object in the image and adding a keyword, the image retrieving device comprising: an image storing section for storing the image, which is supposed to be classified and retrieved together with the keyword in a database (image database, 105,figure 1); an object acknowledging section for acknowledging a predetermined object in the image which is inputted (a user designates an image or holder to be registered. In accordance with the designation a first image is input at step 803, step 805 a decision is made as to whether the input image includes any figure of a person. If so then at step 807 all figures in the image have their respective face images cut out, paragraph [0081-0082]) and in step 813 the name is entered to correspond to the face image then at step 815 the face image cut out and the entered name are correlated with each other and thus registered in the face dictionary, paragraph [0084]); Koshimizu et al teaches retrieving suitable keywords on face images and for retrieving face images based on latent semantic indexing in a face image annotation and a retrieval system . The visual features are represented in sizes lengths of face parts, and symbolic features in keywords, respectively. A space is constructed by applying latent semantic index- big, which is called the

latent semantic space. This space consists of face images and keywords. Also, this space reflects the sizes/lengths of the face parts. Retrieving face images and keywords in terms of sizes/lengths of face parts, and retrieving keywords which are suitable to be assigned to the face images are achieved. Retrieving keywords using the sizes/lengths is corresponding to assignment of keywords to one face image. Neither Kondo nor Koshimizu discloses a keyword relating to the inputted object, as acknowledged by the object acknowledging section, is proposed on a display, the keyword which relates to the inputted object which is acknowledged by the object acknowledging section; and an object information inputting section for confirming by the user, adding, and correcting the keyword which is proposed by the keyword proposing section when the inputted object acknowledged by the object acknowledging section is similar to the object of the image previously contained in the database. The Examiner finds no reason or motivation to combine the above references in an obviousness rejection thus placing the application in condition for allowance.

Any comments considered necessary by applicant must be submitted on later than the payment of the issue fee and to avoid processing delays should preferably accompany the issue fee. Such submissions should be clearly labeled, comments on statement of reasons for allowance.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to NANCY BITAR whose telephone number is (571)270-1041. The examiner can normally be reached on Mon-Fri (7:30a.m. to 5:00pm).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jing Wu can be reached on 571-272-7429. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
